## CORE CAPABILITIES

**Implementation:** Customer discovery, requirements mapping, solution delivery, stakeholder alignment, UAT, go-live, user training

**Technical:** SQL views, joins and data validation; source-to-target mapping, canonical data models, data reconciliation; Power BI, Microsoft Fabric, Azure DevOps; REST API calls with Postman

**Enterprise systems:** Experience integrating data originating from SAP, Oracle and Navision (not ERP configuration)

## EDUCATION & LANGUAGES

B.E., Computer Science and Engineering | PSG College of Technology | 2014–2018 | GPA 8.49/10

Languages: English (fluent) | German (B2 certified)

## PROFESSIONAL PROFILE

Enterprise SaaS implementation consultant with 6 years of experience translating customer requirements into delivered solutions. Owned customer-facing data implementations across 10+ European client engagements, from discovery and source mapping to SQL-based integration, reconciliation and reporting handover. Also led delivery of 12 financial Power BI reports through go-live, including stakeholder alignment, UAT and user training.

## PROFESSIONAL EXPERIENCE

**Senior Consultant | Lang & Fragmeier, Düsseldorf | Nov 2023 – Apr 2025**

- Delivered 12 financial Power BI reports through go-live for a US real estate enterprise undergoing finance modernization, working with a BI engineer on the reporting data model and developing reports against stakeholder requirements.
- Introduced structured feedback rounds in Azure DevOps to reconcile conflicting stakeholder requests, establish report-level agreement and reduce repeated rework during delivery.
- Led onsite user acceptance testing and hands-on training in New York over two weeks, supporting 50 users during rollout; replaced manual Excel-based daily reporting work, reducing an estimated 60 minutes to 20 minutes.

**Solution Delivery – Spendscape | McKinsey & Company, India / Germany | May 2021 – Nov 2023**

- Delivered the data implementation workstream across 10+ enterprise SaaS deployments for European clients, bringing fragmented regional procurement data into a standardized model for downstream spend analytics.
- Owned customer data discovery and source-to-target mapping with data owners; built SQL views to consolidate supplier, invoice and order data across client environments involving 30+ source systems.
- Led financial data reconciliation with client stakeholders, tracing mismatches through source files and SQL layers, correcting defects and approving validated warehouse data for handover to the reporting team.

**Product Owner – ReWoT | McKinsey & Company, India | Jul 2019 – Apr 2021**

- Designed and rolled out an internal request and capacity-tracking tool for 60+ employees, replacing a manual workflow that previously required approximately 2–3 hours daily.

## CAREER DEVELOPMENT | APR 2025 – PRESENT

- Completed professional German language training (Berufssprachkurs B2) and earned B2 certification.
- Built a working prototype of Keel, a habit-redirection app using timed pauses and progress tracking; testing with users and refining the problem definition based on feedback.
